First Office Action on Merits

Claims 1-6 are pending. No claim is allowed. Amendments are entered.

This application is a division of Application No. 10/127180.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 36-41 of DELUCA et al (US Patent No. 5,945,410). Although the conflicting claims are not identical, they are not patentably distinct from each other

Art Unit: 1616

because presently claimed invention is obvious when in DELUCA et al R6 is alkyl and R5 is H. Presently claimed compound contains a methyl group at R6 (in reference, it is an alkyl). Some specific compounds are disclosed in DELUCA et al in claims 37-40.

Presently claimed invention differs from the reference in claiming the method of treating psoriasis by the specific compound (20S)-1alpha-hydroxy-2alpha-methyl-19-nor-vitamin D₃, whereas the reference teaches the same method of treating psoriasis.

It would have been obvious to one skilled in the art to prepare additional compounds useful for the treatment of psoriasis, because the reference teach the uses of these vitamin D compounds.
